

FIGHT YIELD ROBBING INFESTATIONS WITH ZERO DOUBT.

CORN THREAT ALERT: CUTWORMS

Mustang® Maxx insecticide from FMC is here for you.

It doesn't take long for insects to do costly damage to your corn season. Mustang® Maxx insecticide from FMC protects your corn fields with pyrethroid chemistry that is not only proven but enhanced to provide one of the broadest spectrums of insect control on the market. That's especially important right now with recent reports of pressure in Nebraska from cutworms. Mustang Maxx insecticide has a rate range of 1.28 - 2.8 fl. oz. per acre for control of cutworms.

Mustang Maxx insecticide is also labeled to control these four key insect threats in your area:

• APHIDS	• STINK BUG SPP.	• GRASSHOPPERS	• JAPANESE BEETLES
2.72 - 4.0 fl. oz./A	2.72 - 4.0 fl. oz./A	2.72 - 4.0 fl. oz./A	2.72 - 4.0 fl. oz./A

Get better yields and more dollars per acre.

Mustang Maxx insecticide brings the pyrethroid difference to your corn fields.

- Starts working on contact and ingestion with strong residual control of the widest range of insects.
- Is a great tank-mix partner with fungicides, herbicides or spray adjuvants for greater efficiency and ease of application.
- State-of-the-art technology increases the spectrum and length of control for more value from your insecticide dollar.
